A Lecture Entitled "The Methods of Scientific Research" at Al Ain University

The Student Affairs Deanship at Al-Ain University of Science and Technology, based in Abu Dhabi, and in cooperation with the Ministry of Presidential Affairs of the National Archive, organized a lecture on "The Methods of Scientific Research" by Professor Abdul Latif Al Sayyadi, in the presence of members of the academic and administrative bodies and university students.

The professor started the lecture with identifying scientific research and of its great importance in people's lives, because it is the Foundation on which it would upgrade them intellectually, culturally, socially and scientifically and it is also an effective tool for finding and overcoming difficulties.

The lecturer confirmed that scientific research is not for intellectual luxury practiced away from the academy of human concerns, hopes and aspirations, but it is a window which overlooks the

fields of knowledge, innovation and excellence, especially in an era of accelerating when we do not recognize the most militarized Nations in science, knowledge and modern techniques.

He also talked about the characteristics of a research, plus how to write a scientific research using scientific steps in as referring to research methodology...
