Arduino Innovators Workshop Enhances Engineering Students' Practical and Creative Skills

The College of Engineering at Abu Dhabi Campus, organized the "Arduino Innovators Workshop," presented by Eng. Yaman Albadawi. The workshop offered students from various engineering disciplines an interactive, hands-on learning experience in Arduino programming, practical circuit design, and electronics. Participants were introduced to the Arduino Toolkit and Arduino IDE and applied their knowledge through a series of mini projects designed to enhance their technical and practical skills.

The workshop aimed to provide students with the knowledge and experience required to develop their own Arduino-based projects while encouraging creativity, innovation, and problem-solving in the field of engineering.
